

ANISUR RAHMAN

Fullstack AI Engineer | AI Agents & Agentic Systems | RAG Pipelines | MCP & Multi-Agent Protocols
Sylhet, Bangladesh | +880 1710232429 | pshakilwizard@gmail.com | LinkedIn | GitHub | arshakil.com

SKILLS

- **AI & LLM:** AI Agents, Agentic Systems, RAG Pipelines, LangChain, LangGraph, LangSmith, Amazon Bedrock, Claude API, Claude Agent SDK, OpenAI API, OpenAI Agents SDK, Gemini API, MCP, Prompt Engineering, LLM Evaluation & A/B Testing, Human-in-the-Loop Workflows, Context Window Optimization
- **Languages & Frameworks:** Python (FastAPI, Pydantic, Flask), JavaScript/TypeScript (Node.js, NestJS, Express), React, Next.js, React Native
- **Databases & Vector Stores:** PostgreSQL, pgvector, MySQL, MongoDB, Amazon Redshift, Redis
- **Cloud & DevOps:** AWS (Lambda, S3, Bedrock, Serverless), GCP, Docker, Vercel, Railway, CI/CD, GitHub Actions
- **Observability:** New Relic, Datadog, LangSmith Tracing, Custom Dashboards, SLA Monitoring, Alerting
- **Architecture:** Microservices, Event-Driven Architecture, REST APIs, SSE Streaming, System Design, Agile/Scrum, TDD
- **AI-Native Workflow:** Claude Code (Custom Skills, Hooks, MCP Servers), Cursor, AI-Assisted TDD, Agentic Development — **3–5x** individual throughput

WORK EXPERIENCE

Gerald (YC W21), USA

Aug 2022 – Present

Fullstack AI Engineer

- Built AI-powered SEO content engine using Amazon Bedrock & Gemini with automated keyword targeting, backlinking, and LLM evaluation pipelines (LangSmith) — generating **2,500+ posts/hour**, driving **40%** organic conversion lift and **\$96K annual savings**.
- Designed & deployed agentic AI workflows — natural language Slack agents querying Amazon Redshift in real-time with context window optimization and human-in-the-loop confirmation, democratizing data access across non-technical teams.
- Engineered AI-driven funnel optimization with Pydantic-validated data pipelines, reducing Plaid bank connection costs by **75%** (\$100K → \$25K/month), saving **\$900K annually**.
- Built conversational AI system for eCommerce with structured tool calling, SSE streaming, and conversation state management — reducing engineering support time by **80%**.
- Integrated Amazon marketplace via Zinc API, enabling **\$1M monthly order value** with zero inventory risk.
- Implemented observability stack (New Relic, Datadog, LangSmith tracing) with custom dashboards, alerting, and CI/CD quality gates — reducing MTTR by **60%**.
- Led cross-functional team driving sprint planning, code reviews, prompt A/B testing, and on-time delivery of AI-powered product milestones.

Hasty Head (Co-Founded), Remote

2024 – 2025

Co-Founder & AI Technical Lead

- Co-founded a digital agency shipping AI-powered products with agentic workflows and LLM automation for multiple clients.
- Managed a team of **4 developers, 1 designer, and a digital marketing squad**; led sprint meetings, client calls, and technical architecture decisions.
- Built RAG pipelines with pgvector and LangChain for client knowledge-base applications; implemented LLM evaluation and cost-optimization strategies across projects.

re:cruit, USA

Jun 2021 – Aug 2022

Software Engineer

- Created data-driven dashboards & AI-integrated features for multiple YC-backed startups.
- Developed a no-code platform for Shopify (**60%** dev-time reduction).
- Deployed real-time crypto analytics (TradingView.js) aiding a **\$200K** fundraising.
- Implemented an ML-based React Native app, reducing manual work by **80%**.

SJ Innovation LLC, Bangladesh

Nov 2019 – Apr 2021

Fullstack Software Engineer

- Delivered 3 large admin interfaces; designed secure REST APIs handling **100K+ users**.
- Boosted Next.js site performance (**40%** traffic gain); mentored 2 interns on agile practices & code reviews.

Social Energy Ltd., UK

Dec 2018 – Dec 2019

Full Stack Engineer

- Engineered a PWA for solar/battery monitoring achieving **100%** data accuracy for hundreds of homeowners.
- Introduced TDD practices, cutting QA issues by **60%**; integrated Chart.js dashboards for energy usage.

PROJECTS & AI INITIATIVES

- **AI-Powered SEO Content Engine (Gerald):** Production AI system using Amazon Bedrock, Gemini API, and RAG pipelines with LLM evaluation gates (LangSmith) — generating 2,500+ SEO-optimized blog posts/hour with automated keyword targeting & backlinking. Contributed to **\$1M+ monthly GMV** and **\$96K annual savings**.

- **Conversational AI eCommerce Shop:** Built a conversational AI shopping assistant with structured tool calling, conversation state management, intelligent product routing, and SSE streaming — enabling natural language product discovery and customer self-service for an eCommerce client.
- **Tea Leaf Recognition App:** React Native app with a TensorFlow Lite ML model for automated tea-leaf quality classification achieving **~95% accuracy**. On-device inference reduced manual labor by **80%** across tea processing facilities.
- **LLM Wiki Kit (Open Source):** Claude Code skill that maintains an Obsidian-based knowledge base — auto-ingests sources, cross-references pages, and builds a persistent AI-curated wiki. Implementation of Karpathy's LLM Knowledge Base concept. [GitHub](#)

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science
Metropolitan University, Sylhet

Graduation Year: 2021

- **Key Coursework:** Algorithms & Data Structures, OOP, Database Management, Operating Systems
